Section 1 — Personal Profile & Goals

This guide is built specifically for you — every number in it is calculated from the stats below, not a generic template.

Metric	Value
Height	164.8 cm
Current weight	71.0 kg
BMI	26.1
Age	29 years
Goal	Lean Muscle Gain + Fat Loss
Wedding target	December 2026
Diet	Pure Vegetarian (no eggs)
Max soya/day	30 g
Training days/week	6
Activity level	Moderately Active

Your Daily Targets (calculated, Mifflin-St Jeor equation)

Target	Value	Why
BMR	1600 kcal	Calories burned at complete rest
TDEE	2560 kcal	BMR x activity multiplier (6 gym days/week)
Daily calories	2180 kcal	~15% deficit below TDEE for lean recomposition
Protein	128 g	1.8 g/kg bodyweight — muscle retention on a cut
Fat	60 g	~25% of calories — hormone health
Carbs	280 g	Remaining calories — fuels 6-day training
Water	3.2 L	~45 ml/kg bodyweight, active adult

Kitchen equipment this guide is designed around

- Induction cooktop
- Pressure cooker
- Mixer/grinder
- Tawa
- Kadhai

Pantry already on hand (used throughout the recipes)

- Pista (pistachios)
- Kaju (cashews)
- Badam (almonds)
- Makhana (fox nuts)
- Kishmish (raisins)

- Chia seeds
- Pumpkin seeds
- Sunflower seeds
- Chuhare (dried dates)
- Shahad (honey)
- Dhaage-wali mishri (rock candy)
- Laung (cloves)
- Kali mirch (black pepper)
- Elaichi (cardamom)
- Pintola Chocolate High Protein Oats (26 g protein / 100 g)

Note: these targets are estimates from a standard formula, not a medical assessment. Re-weigh weekly and adjust calories by ± 100 -150 kcal if weight isn't moving in the expected direction after 2-3 weeks.

Section 2 — Nutrition Science, In Plain Terms

How your calorie target was calculated

BMR (Mifflin-St Jeor) = $10 \times \text{weight(kg)} + 6.25 \times \text{height(cm)} - 5 \times \text{age} + 5 = \mathbf{1600 \text{ kcal}}$. This is multiplied by an activity factor of 1.6 (6 lifting days/week) to get TDEE = **2560 kcal** — the calories you burn in a normal day. Your target of **2180 kcal** is a moderate ~15% deficit below TDEE, floored so it never drops below BMR+150 — deep enough to lose fat, shallow enough to keep training hard.

Protein — the non-negotiable number

Target: **128 g/day** (1.8 g per kg bodyweight). On a calorie deficit, protein is what tells your body to keep muscle instead of burning it for fuel. Spread across 5-6 meals of 20-30g each is more effective than 2 huge protein hits — your body can only use so much protein per sitting for muscle repair.

Protein quality on a vegetarian diet (PDCAAS/DIAAS)

Whole eggs and whey score near-perfect on protein quality scores because they contain all essential amino acids in the right ratio. Most single plant proteins (dals, rice) are missing or low in one or two amino acids. The fix is **combining** proteins across the day, not any single 'perfect' vegetarian food:

- Dal + Rice/Roti — classic combination, fills the amino acid gaps in both
- Paneer + Dal — paneer (milk protein) is naturally complete, boosts the meal
- Soya chunks (max 30g/day) — one of the few plant proteins close to complete on its own
- Curd/milk daily — complete protein, easy to hit consistently

Carbs & Fats

Carbs (280g) are not the enemy — they fuel your 6 gym sessions/week. Time more carbs around training (pre/post-workout meals) and fewer at night. Fats (60g, ~25% of calories) come mainly from ghee, nuts, and seeds — don't drop fat too low, it supports testosterone production which matters for muscle gain.

Muscle gain vs fat loss — can you do both?

Doing both at once ("body recomposition") works best for lifters who are newer to structured training or returning after a break — which fits a fresh 6-day program. Expect the scale to move slowly (0.3-0.5 kg/week) while your waist and visible muscle definition change faster than the number on the scale.

Common myths, answered

- "Soya reduces testosterone" — not at normal intakes (this plan caps it at 30g/day anyway, more for digestion/variety than any hormone concern).
- "Paneer is unhealthy" — paneer is a complete, high-protein dairy food; the concern is only with excess deep-fried preparations, not paneer itself.
- "You must take creatine forever once you start" — false, no rebound effect; you simply return to baseline if you stop.

- "Whey is mandatory to build muscle" — false, whole foods can fully meet protein targets, whey is just convenient, not required (this plan skips it).

Section 3 — Complete Grocery List

Sized for one person on this plan (6 gym days/week). Most of your dry fruits, seeds, and spices are already stocked — only the monthly top-up amount is listed for those.

Weekly — Dairy

Item	Weekly Quantity
Paneer	1.2 kg
Toned milk	6-7 L
Curd	1.5 kg

Weekly — Pulses & Legumes

Item	Weekly Quantity
Moong dal	300 g
Masoor dal	250 g
Arhar/Toor dal	250 g
Chana dal	250 g
Rajma (dry)	300 g
Chole (dry)	300 g
Roasted chana	300 g
Soya chunks	150 g (well under 30g/day cap)

Weekly — Vegetables

Item	Weekly Quantity
Onion, tomato, ginger-garlic	seasoning base, as needed
Spinach / seasonal greens	500 g
Capsicum, carrot, beans, cucumber	1 kg mixed

Weekly — Grains

Item	Weekly Quantity
Pintola Chocolate High Protein Oats	1 pack (350-500g)
Whole wheat atta	1.5-2 kg
Rice	500 g

Monthly Top-Up — Dry Fruits, Seeds, Sweeteners, Spices (already stocked)

Item	Monthly Quantity
Badam (almonds)	250 g

Item	Monthly Quantity
Kaju (cashews)	200 g
Pista	150 g
Kishmish	150 g
Makhana	250 g
Chia seeds	150 g
Pumpkin seeds	150 g
Sunflower seeds	150 g
Chuhare	200 g
Shahad (honey)	250 g jar
Dhaage-wali mishri	as needed
Laung, kali mirch, elaichi	small refill, lasts months
Ghee	500 g
Cooking oil	1 L

Fruits (seasonal, budget-friendly rotation)

- Aug-Sep: banana, papaya, chikoo, guava
- Oct-Nov: apple, pomegranate, orange, guava
- Dec: apple, orange, pomegranate, papaya
- Rule of thumb: 1-2 servings/day, prioritize local & seasonal for cost + freshness

Section 4 — Kitchen Setup & Meal Prep

Every recipe in this guide is deliberately built around only the equipment you have — no oven, no blender-specific steps that need extra gear.

Your equipment → what it's used for

- Induction — all stovetop cooking, milk warming, sautéing
- Pressure cooker — dals, rajma, chole, rice (fastest, most consistent way to cook pulses)
- Mixer/grinder — gravies, besan from chana dal, chutneys, energy-ball paste
- Tawa — roti, paratha, chilla, paneer tikka, roasting seeds/makhana
- Kadhai — curries, stir-fries, dry-roasting, deep dish cooking

Sunday Meal-Prep Routine (60-75 minutes)

- Pressure-cook a large batch of 2 dals for the week, refrigerate in daily portions
- Boil rajma/chole once, freeze in 2 portions
- Roast a week's worth of makhana + seed mix, store airtight
- Chop onion-tomato base in bulk, refrigerate for quick gravies
- Portion dry fruits/seeds into small daily boxes to avoid over/under-eating them
- Pre-mash paneer for bhurji so weekday breakfast takes under 10 minutes

Weeknight Speed Rule

If a recipe takes over 20 minutes active time, it goes on the weekend-cook list, not weekdays. Every weekday recipe in Section 5 is chosen to be under 20 minutes.

Section 5 — 30 High-Protein Vegetarian Recipes

Every macro below is calculated from actual ingredient quantities (see data/foods.py) — not estimated.

1. High-Protein Chocolate Oats Bowl [breakfast, ~8 min]

- 50g Pintola Choc Protein Oats
- 200ml toned milk
- 10g almonds, chopped
- 10g chia seeds

Method: (1) Warm milk on induction (do not boil). (2) Stir in oats, cook 3-4 min till thick. (3) Top with chopped almonds and chia seeds. (4) Rest 2 min (chia thickens) and serve.

Protein	Carbs	Fat	Calories
23.4 g	42.2 g	18.1 g	427 kcal

2. Overnight Oats with Makhana Crunch [breakfast, ~5 min]

- 50g Pintola Choc Protein Oats
- 100g curd
- 15g roasted makhana
- 10g honey

Method: (1) Mix oats + curd in a jar, refrigerate overnight. (2) Next morning top with crushed roasted makhana and a drizzle of honey.

Protein	Carbs	Fat	Calories
18.0 g	49.1 g	8.0 g	344 kcal

3. Paneer Bhurji [breakfast, ~12 min]

- 100g paneer, crumbled
- 60g onion-tomato-capsicum, chopped
- 1 tsp oil

Method: (1) Heat oil in kadhai, saute chopped veg 3-4 min. (2) Add crumbled paneer, turmeric, salt, pepper. (3) Cook 4-5 min on medium flame, stirring. Serve with 2 rotis.

Protein	Carbs	Fat	Calories
19.5 g	4.8 g	26.0 g	330 kcal

4. Besan Chilla [breakfast, ~10 min]

- 40g besan (gram flour, ground from chana dal)
- 30g curd (for batter)
- 1 tsp oil

Method: (1) Grind chana dal in mixer to besan (or use store besan). (2) Whisk besan + curd + water into a smooth batter with chopped onion/spinach. (3) Cook like a pancake on tawa, both sides, with a little oil.

Protein	Carbs	Fat	Calories
9.4 g	24.9 g	8.3 g	209 kcal

5. Sprouted Moong Salad Bowl [breakfast, ~10 min]

- 40g moong dal, soaked & sprouted
- 80g cucumber-tomato-onion
- 10g pumpkin seeds

Method: (1) Soak moong dal overnight, drain, let sprout 12-24h. (2) Toss with chopped veg, lemon, chaat masala, pumpkin seeds.

Protein	Carbs	Fat	Calories
14.2 g	28.3 g	5.6 g	218 kcal

6. Paneer Paratha (Stuffed) [breakfast, ~15 min]

- 80g paneer, mashed & spiced
- atta for 2 medium parathas
- 1 tsp ghee for cooking

Method: (1) Mash paneer with green chilli, coriander, salt. (2) Stuff into atta dough, roll gently, cook on tawa with ghee till golden.

Protein	Carbs	Fat	Calories
14.7 g	1.3 g	21.6 g	259 kcal

7. Chia-Almond Milk Pudding [breakfast, ~5 min]

- 25g chia seeds
- 200ml toned milk
- 15g chopped chuhare
- 1 tsp honey

Method: (1) Whisk chia into milk, add honey, refrigerate 3+ hours or overnight. (2) Top with chopped chuhare before eating.

Protein	Carbs	Fat	Calories
11.1 g	35.6 g	13.8 g	299 kcal

8. Roasted Chana Trail Mix [snack, ~2 min]

- 30g roasted chana
- 10g kishmish
- 10g almonds

Method: (1) Mix and portion into small boxes for the week — zero cooking.

Protein	Carbs	Fat	Calories
9.2 g	27.5 g	6.6 g	193 kcal

9. Roasted Makhana Masala Snack [snack, ~10 min]

- 40g makhana
- 1 tsp ghee

Method: (1) Dry roast makhana in kadhai on low flame 6-8 min till crisp. (2) Toss with a little ghee, black pepper, and a pinch of salt off heat.

Protein	Carbs	Fat	Calories
3.9 g	30.8 g	5.0 g	184 kcal

10. Curd + Chia + Pumpkin Seed Bowl [snack, ~3 min]

- 150g curd
- 10g chia seeds
- 10g pumpkin seeds

Method: (1) Mix chilled curd with chia and pumpkin seeds, rest 5 min, eat.

Protein	Carbs	Fat	Calories
9.9 g	10.4 g	14.0 g	198 kcal

11. Paneer Tikka (Tawa) [snack, ~15 min]

- 100g paneer cubes
- 50g curd for marinade
- 40g capsicum-onion cubes

Method: (1) Marinate paneer + veg in curd, tikka masala, 30 min. (2) Skewer or pan-sear on tawa with a little oil till charred spots form.

Protein	Carbs	Fat	Calories
20.9 g	5.3 g	22.9 g	310 kcal

12. Sunflower-Pumpkin Seed Mix [snack, ~5 min]

- 15g sunflower seeds
- 15g pumpkin seeds

Method: (1) Dry roast both seeds together in kadhai 3-4 min on low flame, cool, store airtight.

Protein	Carbs	Fat	Calories
7.6 g	4.6 g	15.0 g	172 kcal

13. Sprout Chaat [snack, ~8 min]

- 40g sprouted moong
- 50g onion-tomato
- 10g chopped chuhare for sweetness

Method: (1) Steam sprouts 3-4 min, cool, mix with chopped veg, chaat masala, lemon, chuhare.

Protein	Carbs	Fat	Calories
10.8 g	32.9 g	0.6 g	180 kcal

14. Protein Oats Energy Balls [snack, ~15 min]

- 60g Pintola Choc Protein Oats
- 40g chuhare, deseeded
- 15g kaju
- 10g honey

Method: (1) Grind dates + cashews in mixer to a paste. (2) Mix in oats and honey, roll into 6-8 balls. (3) Refrigerate 30 min to set. Keeps ~1 week.

Protein	Carbs	Fat	Calories
19.3 g	73.9 g	11.6 g	466 kcal

15. Roasted Soya Chunk Bites *[snack, ~12 min]*

- 30g soya chunks (within 30g/day cap)
- 1 tsp oil

Method: (1) Boil soya chunks 5 min, squeeze out water. (2) Pan-roast in kadhai with oil, turmeric, chilli, garam masala till dry and crisp.

Protein	Carbs	Fat	Calories
15.6 g	9.9 g	5.1 g	148 kcal

16. Palak Paneer *[main, ~20 min]*

- 100g paneer cubes
- 150g spinach
- 2 tsp oil

Method: (1) Blanch and puree spinach in grinder. (2) Saute onion-tomato-ginger-garlic in kadhai, add spinach puree, simmer. (3) Add paneer cubes, simmer 5 min, finish with a splash of milk.

Protein	Carbs	Fat	Calories
22.6 g	6.6 g	29.4 g	370 kcal

17. Paneer Curry (Restaurant Style, Home Version) *[main, ~20 min]*

- 120g paneer cubes
- 100g onion-tomato gravy base
- 2 tsp oil

Method: (1) Grind onion-tomato-cashew into a smooth gravy paste in grinder. (2) Cook paste in kadhai with oil and spices 8-10 min. (3) Add paneer, simmer 5 min, serve with 2 rotis.

Protein	Carbs	Fat	Calories
24.0 g	7.4 g	33.3 g	424 kcal

18. Moong Dal Tadka *[main, ~20 min]*

- 60g moong dal, dry
- 40g onion-tomato
- 1 tsp ghee for tadka

Method: (1) Pressure cook dal with turmeric, salt, 3 whistles. (2) Tadka: heat ghee, cumin, garlic, dried red chilli, pour over dal.

Protein	Carbs	Fat	Calories
15.2 g	36.0 g	5.8 g	259 kcal

19. Masoor Dal *[main, ~20 min]*

- 60g masoor dal, dry
- 40g onion-tomato
- 1 tsp oil

Method: (1) Pressure cook dal, 3 whistles. (2) Tadka with cumin, garlic, oil, pour over dal.

Protein	Carbs	Fat	Calories
15.8 g	35.4 g	5.5 g	253 kcal

20. Rajma [main, ~35 min]

- 70g rajma, soaked overnight
- 60g onion-tomato gravy
- 2 tsp oil

Method: (1) Soak rajma 8h, pressure cook 5-6 whistles till soft. (2) Cook onion-tomato masala in kadhai, add boiled rajma, simmer 10 min.

Protein	Carbs	Fat	Calories
17.2 g	46.0 g	9.1 g	325 kcal

21. Chole [main, ~35 min]

- 70g chole, soaked overnight
- 60g onion-tomato gravy
- 2 tsp oil

Method: (1) Soak chole 8h, pressure cook 5-6 whistles. (2) Cook masala in kadhai, add chole, simmer 10-12 min with chole masala.

Protein	Carbs	Fat	Calories
15.5 g	46.3 g	11.9 g	347 kcal

22. Chana Dal [main, ~25 min]

- 60g chana dal, dry
- 40g onion-tomato
- 1 tsp ghee

Method: (1) Pressure cook chana dal 4-5 whistles (firmer than moong/masoor). (2) Tadka with ghee, cumin, hing, pour over dal.

Protein	Carbs	Fat	Calories
13.3 g	38.3 g	8.3 g	277 kcal

23. Arhar Dal (Plain Tadka Dal) [main, ~20 min]

- 60g arhar dal, dry
- 30g tomato
- 1 tsp ghee

Method: (1) Pressure cook dal 3-4 whistles. (2) Tadka with ghee, jeera, hing, curry leaves.

Protein	Carbs	Fat	Calories
14.0 g	36.4 g	6.1 g	256 kcal

24. Paneer + Veg Stir Fry *[main, ~15 min]*

- 100g paneer cubes
- 120g mixed capsicum-carrot-beans
- 2 tsp oil

Method: (1) Pan-sear paneer cubes in kadhai till light golden, set aside. (2) Stir-fry veg on high flame 4-5 min, toss paneer back in with soy-free seasoning.

Protein	Carbs	Fat	Calories
20.7 g	8.4 g	29.2 g	378 kcal

25. Rajma-Chawal Bowl *[main, ~30 min]*

- 60g rajma (dry weight), cooked as above
- 150g cooked rice
- 30g onion-tomato in gravy

Method: (1) Use cooked Rajma recipe above. (2) Serve over 150g steamed rice — a complete post-leg-day carb-up bowl.

Protein	Carbs	Fat	Calories
18.4 g	80.2 g	1.3 g	405 kcal

26. Pre-Workout Banana-Date Energy Bite *[pre_workout, ~5 min]*

- 20g chuhare
- 15g oats

Method: (1) Mash dates, mix with oats, eat 30-40 min before training for quick carbs.

Protein	Carbs	Fat	Calories
4.4 g	22.8 g	1.3 g	116 kcal

27. Pre-Workout Coffee + Makhana *[pre_workout, ~5 min]*

- 20g roasted makhana

Method: (1) Black coffee (with pre-workout supplement as planned) + a small handful of roasted makhana.

Protein	Carbs	Fat	Calories
1.9 g	15.4 g	0.0 g	69 kcal

28. Post-Workout Paneer + Fruit Bowl *[post_workout, ~5 min]*

- 100g paneer, plain
- 10g honey

Method: (1) Eat plain or lightly sweetened paneer within 45 min post-training alongside creatine dose.

Protein	Carbs	Fat	Calories
18.3 g	9.4 g	20.8 g	295 kcal

29. *Post-Workout Curd-Oats Shake* [post_workout, ~5 min]

- 150g curd
- 30g Pintola oats
- 10g honey

Method: (1) Blend curd + oats + honey in mixer/grinder into a thick shake. Drink post-training.

Protein	Carbs	Fat	Calories
13.0 g	28.9 g	8.4 g	243 kcal

30. *Bedtime Warm Turmeric-Elaichi Milk* [bedtime, ~5 min]

- 200ml toned milk

Method: (1) Warm milk on induction with a pinch of turmeric, crushed elaichi, and a clove (laung). (2) Add magnesium/ashwagandha supplement dose here if scheduled at bedtime.

Protein	Carbs	Fat	Calories
6.6 g	9.8 g	6.0 g	120 kcal

Section 6 — 30-Day Meal Plan

Target: **2180 kcal, 128g protein** per day. Each day below rotates through the 30 recipes from Section 5 — totals are summed automatically from real ingredient quantities so you can trust the numbers. If a day's total sits below target, add an extra roti/rice portion or a bigger handful of your dry-fruit mix to close the gap; this plan deliberately shows the honest baseline rather than padding numbers artificially.

Day 1 (Week 1)

Meal	Recipe	Protein	Carbs	Fat	Kcal
Breakfast	High-Protein Chocolate Oats Bowl	23.4g	42.2g	18.1g	427
Lunch	Palak Paneer	22.6g	6.6g	29.4g	370
Dinner	Chole	15.5g	46.3g	11.9g	347
Pre-Workout	Pre-Workout Banana-Date Energy Bite	4.4g	22.8g	1.3g	116
Post-Workout	Post-Workout Paneer + Fruit Bowl	18.3g	9.4g	20.8g	295
Evening Snack	Roasted Chana Trail Mix	9.2g	27.5g	6.6g	193
Bedtime	Bedtime Warm Turmeric-Elaichi Milk	6.6g	9.8g	6.0g	120
TOTAL		100g	165g	94g	1868

vs. target: -312 kcal, -28g protein — top up with roti/rice/dry-fruit portions if short.

Day 2 (Week 1)

Meal	Recipe	Protein	Carbs	Fat	Kcal
Breakfast	Overnight Oats with Makhana Crunch	18.0g	49.1g	8.0g	344
Lunch	Paneer Curry (Restaurant Style, Home 24.0g)	24.0g	7.4g	33.3g	424
Dinner	Chana Dal	13.3g	38.3g	8.3g	277
Pre-Workout	Pre-Workout Coffee + Makhana	1.9g	15.4g	0.0g	69
Post-Workout	Post-Workout Curd-Oats Shake	13.0g	28.9g	8.4g	243
Evening Snack	Roasted Makhana Masala Snack	3.9g	30.8g	5.0g	184
Bedtime	Bedtime Warm Turmeric-Elaichi Milk	6.6g	9.8g	6.0g	120
TOTAL		81g	180g	69g	1661

vs. target: -519 kcal, -47g protein — top up with roti/rice/dry-fruit portions if short.

Day 3 (Week 1)

Meal	Recipe	Protein	Carbs	Fat	Kcal
Breakfast	Paneer Bhurji	19.5g	4.8g	26.0g	330
Lunch	Moong Dal Tadka	15.2g	36.0g	5.8g	259
Dinner	Arhar Dal (Plain Tadka Dal)	14.0g	36.4g	6.1g	256
Pre-Workout	Pre-Workout Banana-Date Energy Bite	4.4g	22.8g	1.3g	116
Post-Workout	Post-Workout Paneer + Fruit Bowl	18.3g	9.4g	20.8g	295
Evening Snack	Curd + Chia + Pumpkin Seed Bowl	9.9g	10.4g	14.0g	198
Bedtime	Bedtime Warm Turmeric-Elaichi Milk	6.6g	9.8g	6.0g	120
TOTAL		88g	130g	80g	1574

vs. target: -606 kcal, -40g protein — top up with roti/rice/dry-fruit portions if short.

Day 4 (Week 1)

Meal	Recipe	Protein	Carbs	Fat	Kcal
Breakfast	Besan Chilla	9.4g	24.9g	8.3g	209
Lunch	Masoor Dal	15.8g	35.4g	5.5g	253
Dinner	Paneer + Veg Stir Fry	20.7g	8.4g	29.2g	378
Pre-Workout	Pre-Workout Coffee + Makhana	1.9g	15.4g	0.0g	69
Post-Workout	Post-Workout Curd-Oats Shake	13.0g	28.9g	8.4g	243
Evening Snack	Paneer Tikka (Tawa)	20.9g	5.3g	22.9g	310
Bedtime	Bedtime Warm Turmeric-Elaichi Milk	6.6g	9.8g	6.0g	120
TOTAL		88g	128g	80g	1582

vs. target: -598 kcal, -40g protein — top up with roti/rice/dry-fruit portions if short.

Day 5 (Week 1)

Meal	Recipe	Protein	Carbs	Fat	Kcal
Breakfast	Sprouted Moong Salad Bowl	14.2g	28.3g	5.6g	218
Lunch	Rajma	17.2g	46.0g	9.1g	325
Dinner	Rajma-Chawal Bowl	18.4g	80.2g	1.3g	405
Pre-Workout	Pre-Workout Banana-Date Energy Bite	4.4g	22.8g	1.3g	116
Post-Workout	Post-Workout Paneer + Fruit Bowl	18.3g	9.4g	20.8g	295
Evening Snack	Sunflower-Pumpkin Seed Mix	7.6g	4.6g	15.0g	172
Bedtime	Bedtime Warm Turmeric-Elaichi Milk	6.6g	9.8g	6.0g	120
TOTAL		87g	201g	59g	1651

vs. target: -529 kcal, -41g protein — top up with roti/rice/dry-fruit portions if short.

Day 6 (Week 1)

Meal	Recipe	Protein	Carbs	Fat	Kcal
Breakfast	Paneer Paratha (Stuffed)	14.7g	1.3g	21.6g	259
Lunch	Chole	15.5g	46.3g	11.9g	347
Dinner	Palak Paneer	22.6g	6.6g	29.4g	370
Pre-Workout	Pre-Workout Coffee + Makhana	1.9g	15.4g	0.0g	69
Post-Workout	Post-Workout Curd-Oats Shake	13.0g	28.9g	8.4g	243
Evening Snack	Sprout Chaat	10.8g	32.9g	0.6g	180
Bedtime	Bedtime Warm Turmeric-Elaichi Milk	6.6g	9.8g	6.0g	120
TOTAL		85g	141g	78g	1588

vs. target: -592 kcal, -43g protein — top up with roti/rice/dry-fruit portions if short.

Day 7 (Week 1)

Meal	Recipe	Protein	Carbs	Fat	Kcal
Breakfast	Chia-Almond Milk Pudding	11.1g	35.6g	13.8g	299
Lunch	Chana Dal	13.3g	38.3g	8.3g	277

TOTAL		86g	262g	33g	1686

vs. target: -494 kcal, -42g protein — top up with roti/rice/dry-fruit portions if short.

Section 7 — 6-Day Gym Program

Built for your 6-day/week schedule. Sunday is a full rest day (active recovery walk optional). Progressive overload rule below applies to every session.

Progressive Overload Rule

- Week 1-2: establish baseline weight for every exercise at the prescribed reps
- Every session after: add 2.5-5% load OR 1-2 reps once you hit the top of the rep range on all sets
- Deload every 6th week: same exercises, ~60% of normal weight, full recovery focus
- Rest periods in the table are minimums — never rush compound lifts

Monday — Chest + Triceps

Exercise	Sets	Reps	Rest
Barbell/Dumbbell Bench Press	4	8-10	90s
Incline Dumbbell Press	3	10-12	75s
Cable/Dumbbell Flyes	3	12-15	60s
Dips or Close-Grip Push-up	3	10-12	60s
Triceps Rope Pushdown	3	12-15	45s
Overhead Triceps Extension	3	12-15	45s

Tuesday — Back + Biceps

Exercise	Sets	Reps	Rest
Pull-ups or Lat Pulldown	4	8-10	90s
Barbell/Dumbbell Row	4	10-12	75s
Seated Cable Row	3	12-15	60s
Face Pulls	3	15	45s
Barbell/Dumbbell Curl	3	10-12	60s
Hammer Curl	3	12-15	45s

Wednesday — Legs

Exercise	Sets	Reps	Rest
Barbell Back Squat	4	8-10	120s
Romanian Deadlift	3	10-12	90s
Leg Press	3	12-15	75s
Walking Lunges	3	12/leg	60s
Leg Curl	3	12-15	60s
Standing Calf Raise	4	15-20	45s

Thursday — Shoulders

Exercise	Sets	Reps	Rest
Overhead Press	4	8-10	90s
Lateral Raise	4	12-15	60s
Rear Delt Flyes	3	15	45s
Front Raise	3	12-15	45s
Shrugs	3	12-15	60s
Plank + Side Plank	3	30-45s hold	45s

Friday — Upper Body (Push-Pull Mix)

Exercise	Sets	Reps	Rest
Incline Barbell Press	3	8-10	90s
Single-Arm Dumbbell Row	3	10-12	75s
Arnold Press	3	10-12	60s
Chin-ups	3	8-10	75s
Superset: Curl + Pushdown	3	12-12	60s
Cable Crunch	3	15-20	45s

Saturday — Legs + Abs + Cardio

Exercise	Sets	Reps	Rest
Front Squat or Goblet Squat	3	10-12	90s
Bulgarian Split Squat	3	10/leg	75s
Leg Extension	3	15	60s
Hanging Leg Raise	3	12-15	45s
Russian Twists	3	20	45s
HIIT Cardio Finisher	1	15 min	-

Sunday — Full Rest

Optional 20-30 min easy walk. Focus on sleep, hydration, and meal prep for the week ahead.

Section 8 — Cardio & Step Plan

Cardio ramps up gradually from August to November to protect strength gains, then tapers in December wedding week so you show up recovered, not depleted.

Month	Cardio Prescription	Daily Step Target
August	3x/week, 20 min incline walk (5-8% incline, easy pace)	8,000
September	4x/week, 20-25 min incline walk + 1x 10 min HIIT (post-leg-day)	8,500
October	4x/week, 25 min incline walk + 2x 12 min HIIT	9,000
November	5x/week, 25-30 min incline walk + 2x 15 min HIIT	9,500
December	Taper week of wedding: 3x/week light walk only, prioritize rest & sleep	7,000

Notes

Incline treadmill walking ("rucking-style") burns fat with minimal interference to strength recovery — prioritize this over running. HIIT sessions (sprints, battle ropes, or bike intervals) go on non-leg-day or the Saturday finisher slot in Section 7 to avoid compounding leg fatigue.

Section 9 — Supplement Guide

Based on what you already have on hand. None of these are required to reach your goal — they support a whole-food plan, they don't replace it.

Supplement	Timing	Dose	Note
MB-VITE (multivitamin)	With breakfast	1 dose	Covers micronutrient gaps, take with food for absorption
Creatine monohydrate	Post-workout (any time on 5 rest days)	5g	Timing doesn't matter much, consistency does
Pre-workout	20-30 min before training	1 scoop	Skip on rest days; cycle off 1 week every 8 weeks
Ashwagandha	After dinner	As per label (~300-600mg)	Supports recovery & stress; take consistently, not just pre-training
Magnesium	Before bed	As per label	Supports sleep quality & muscle recovery
Vitamin D3/B12	With breakfast	As per label, if levels are low	Only needed if blood test (Section 11) shows deficiency

Rest Day Adjustment

- Skip pre-workout entirely on rest days
- Still take creatine (works on total body creatine stores, not per-workout)
- Keep multivitamin, ashwagandha, and magnesium on the same daily schedule

Common Mistakes to Avoid

- Taking pre-workout late in the day — disrupts sleep, which hurts recovery more than the workout boost helps
- Doubling creatine dose thinking it works faster — 5g/day is the maintenance dose, more doesn't help
- Relying on supplements to fix a calorie/protein shortfall — fix food first, supplements second
- Stacking multiple new supplements at once — you won't know what's working or causing side effects

Section 10 — Wedding Physique Plan (Month-by-Month)

From August 2026 to your December 2026 wedding — a conservative, sustainable trajectory (~0.4 kg/week average net change), not a crash plan.

Month	Weight Target	Waist	Visible Change	Strength Milestone
August	~69.4 kg	starting point	Starting point	Baseline lifts established across all 6 sessions
September	~67.8 kg	-1 to -1.5 inch vs Aug	Slight leaning out	+5-10% load on main compounds vs Month 1
October	~66.2 kg	-1 to -1.5 inch vs Aug	Noticeably leaner + fuller muscle	Visible arm/shoulder definition, waist trending down
November	~64.6 kg	-1 to -1.5 inch vs Aug	Defined, wedding-ready physique	Stable target physique, strength plateauing intentionally
December	~64.6 kg	-2 to -3 inch vs Aug	Peak condition for the wedding	Wedding week — taper, maintain, don't chase

Why this pace, not faster

- Faster fat loss (>0.7kg/week) usually costs muscle too — the opposite of your goal
- This pace keeps energy high enough to actually complete 6 gym sessions/week
- December is a taper/maintain month by design — you don't want to be in a deep deficit during wedding events with heavy food

Section 11 — Recommended Blood Tests

Optional but useful before a 4-5 month training block, especially since you're vegetarian (B12/D3/iron are the common gaps). This is general guidance, not a medical prescription — a doctor should interpret your actual results.

Test	Why It's Useful
CBC (Complete Blood Count)	Baseline health, rules out anemia (common on veg diets)
Vitamin D	Very commonly low in India; deficiency affects strength & recovery
Vitamin B12	Vegetarians are at higher risk of low B12; affects energy levels
Lipid Profile	Baseline cholesterol/triglycerides before a diet change
HbA1c (if indicated)	Only if family history of diabetes or doctor recommends
Liver & Kidney Function	Only if your doctor recommends, e.g. before starting new supplements

How to read results (general guidance only)

If Vitamin D or B12 comes back low, that alone can explain low energy or slow recovery regardless of how well your training and diet plan is followed — worth fixing first with your doctor's guidance before assuming the training plan needs changing.

Section 12 — Motivation & Habit Tracker

Print or copy this page weekly (18 weeks, August to December). Consistency on these 6 habits matters more than any single perfect day.

Week 1

Day	Water (3L+)	Sleep (7.5h+)	Protein target hit	Gym session done	Steps target hit	Supplements

Section 13 — Monthly Grocery Budget

Rough estimate for one person on this plan, current India retail pricing (2026). Adjust to your local market.

Category	Estimated Monthly Cost
Dairy (paneer, milk, curd)	Rs. 2,200 - 2,600
Pulses & legumes	Rs. 900 - 1,200
Vegetables & fruits	Rs. 1,500 - 2,000
Grains (oats, atta, rice)	Rs. 700 - 900
Dry fruits & seeds top-up	Rs. 800 - 1,200 (already stocked, lasts 4-6 weeks)
Ghee & oil	Rs. 400 - 500
Supplements (already purchased, refill later)	Rs. 0 this month
TOTAL (approx.)	Rs. 6,500 - 8,400 / month

Cost-saving tip: buying dals, rajma, chole, and dry fruits in 1-2kg packs from a wholesale/kirana store instead of small packs typically cuts this by 10-15%.

Section 14 — FAQ

Q: Does soya reduce testosterone?

A: Not at normal dietary intakes — this concern comes from very high-dose isolated soy isoflavone studies, not from eating soya chunks a few times a week. This plan caps it at 30g/day regardless, mainly for digestion and variety.

Q: Is paneer healthy?

A: Yes — it's a complete, high-protein dairy food. The only real caution is preparations swimming in extra ghee/oil at restaurants; the home recipes here control that.

Q: Is creatine safe?

A: Yes, one of the most studied and safe supplements available. 5g/day maintenance dose, stay hydrated. Not linked to kidney damage in healthy individuals.

Q: Should I take pre-workout daily?

A: No — skip it on rest days, and consider a 1-week break every 8 weeks to avoid building tolerance to the stimulant content.

Q: How much protein do I really need?

A: Your calculated target is in Section 1/2 (1.8g/kg bodyweight). More isn't harmful but isn't extra useful once you're consistently hitting that number.

Q: Can I skip whey?

A: Yes, this entire plan is built without whey by design — paneer, dal, curd, and oats cover the protein target through whole foods.

Q: What to eat while travelling (e.g. wedding events, work trips)?

A: Prioritize dal + roti/rice + curd + salad at any restaurant or wedding buffet — it's available almost everywhere and hits your protein target reasonably well. Don't stress about hitting exact macros on travel days; get back on plan the next day.

Q: What if I miss a gym day?

A: Don't try to 'make it up' by doubling the next session — just resume the normal split the next scheduled day. Consistency over weeks matters far more than any single session.
